Rhtslib-package      *An R packaged HTSlib 1.7*

### Description

This package is interesting to package developers only, and provides a compiled HTSlib for developers to use in their own packages. See the vignette for instructions on use.

### Details

Instructions for use are in the vignette, available with `browseVignettes(package="Rhtslib")`

### Author(s)

Rhtslib:::htsVersion()
```

pkgconfig      *Compiler configuration arguments for use of Rhtslib*

### Description

This function returns values for `PKG_LIBS` and `PKG_CPPFLAGS` variables for use in Makevars files. See `vignette("Rhtslib")` for details. The environment variable `RHTSLIB_RPATH` can be used to over-ride the inferred location of the installed package.

### Usage

```
pkgconfig(opt = c("PKG_LIBS", "PKG_CPPFLAGS"))
```

**Arguments**

opt                    A scalar character from the list of available options; default is PKG\_LIBS.

**Value**

NULL; prints the corresponding value to stdout.

**Examples**

```
pkgconfig("PKG_LIBS")  
pkgconfig("PKG_CPPFLAGS")
```
