

Package ‘MethylAidData’

October 5, 2023

Type Package

Title MethylAid-summarized data for 2800 Illumina 450k array samples and 2620 EPIC array samples

Version 1.32.0

Date 2018-03-24

Author Davy Cats, Tyler J. Gorrie-Stone, Bastiaan T. Heijmans, John W. Holloway, BIOS Consortium, Maarten van Iterson, Faisal I. Rezwan, Leonard Schalkwyk

Maintainer M. van Iterson <mviterson@gmail.com>

Description A data package containing summarized Illumina 450k array data on 2800 samples and summarized EPIC data for 2620 samples. The data can be use as a background data set in the interactive application.

<code>MethylAidDataEPIC</code>	2

Index**4**

exampleDataLarge	<i>summarizedData object on 2800 450k Human Methylation samples</i>
------------------	---

Description

Summarized 450K data on 2800 samples. The data can be used as a background data set in the interactive application.

Usage

```
exampleDataLarge
```

Format

```
summarizedData-object
```

Value

Pre-summarizedData object on 2800 450k Human Methylation samples.

Examples

```
library(MethylAid)
data(exampleDataLarge)
data(exampleData)
## Not run: visualize(exampleData, background=exampleDataLarge)
library(minfiData)
baseDir <- system.file("extdata", package="minfiData")
targets <- read.metharray.sheet(baseDir)
data <- summarize(targets)
## Not run: visualize(data, background=exampleDataLarge)
```

MethylAidDataEPIC	<i>summarizedData object for 2620 EPIC Human Methylation samples</i>
-------------------	--

Description

Summarized EPIC data for 2620 samples. The data can be used as a background data set in the interactive application.

Usage

```
MethylAidDataEPIC
```

Format

summarizedData-object

Value

Pre-summarizedData object for 2620 EPIC Human Methylation samples.

Examples

```
data(MethylAidDataEPIC)
library(minfiDataEPIC)
baseDir <- system.file("extdata", package="minfiDataEPIC")
targets <- read.metharray.sheet(baseDir)
data <- summarize(targets)
## Not run: visualize(data, background=MethylAidDataEPIC)
```
